

Nunc Platform

RSTP Presentation (Kingdom of Eswatini)

Presented by: Nunc Development Team (Liyandza M.Masuku)

Date: 18/05/2026

Venue: RSTP Innovation Park, Phocweni

Table of Contents

01	Executive Summary	02	Vision & Mission
03	The Team Behind Nunc	04	App Overview & Features
05	Complementing "Government in Your Hands"	06	Public Benefits
07	Government Tool Advantages	08	Youth Engagement Strategy
09	Strategic Partnership Framework	10	Implementation Roadmap
11	Conclusion & Call to Action		

Executive Summary

Nunc — A Youth-Driven Lifestyle Platform

Comprehensive mobile lifestyle platform designed, developed, and driven by Swazi youth to promote:

- Healthy living
- Financial responsibility
- Community engagement
- Information accessibility
- A digitally connected society

Our Ask

- ✓ RSTP/Ministry endorsement to facilitate strategic partnerships (MTN Eswatini, Municipalities)
- ✓ Integration with existing government digital data (FAQs)
- ✓ Recognition as a complementary youth engagement tool

What Makes Us Different

**“This is not just another app...
we build movements.”**

Vision, passion, and problem-solving capacity of Swazi youth

**Balance between technological capability and authentic
community connection**

Community-first platform building (not just features)

“We don't just build platforms; we build movements.”

Vision

To become Eswatini's leading youth-driven digital platform bridging technology, community, and government services—empowering every Swazi to live healthier, smarter, and more connected lives.

Mission and Core Values

Mission

Empower Youth

tools for personal development (health, finance, spiritual growth)

Facilitate Access

simplify information discovery and government service awareness

Build Community

safe digital spaces for authentic connection

Drive Innovation

world-class technology by Swazi youth for Swazis

Core Values

Authenticity

Innovation

Ubuntu

Excellence

Why Team Matters

“The app is a tool. The team is the engine.”

What cannot be replicated:

The “Why”

Deep understanding of Swazi youth challenges (financial struggles, health awareness gaps, information access barriers)

The “How”

Practical problem-solving born from lived experience, not theoretical frameworks

The Vision

Foresight to anticipate obstacles and design solutions before problems emerge

The Balance

Logic meets emotion. We build with technical excellence and authentic connection.

The Nunc Balance

(Corporate Approach)

- Monetary-driven decisions
- Disconnection from grassroots needs
- Users are "data points," not people

Example: Many failed government apps with low adoption

(Idealistic Approach)

- Unsustainable models
- Poor execution despite good intentions

Example: NGO platforms that fade after funding ends

(The Nunc Balance)

Technical Excellence: enterprise-grade architecture, security, scalability

Authentic Connection: built by youth who share user struggles

Sustainable Model: revenue without compromising accessibility

Community Trust: perceived as "ours," not "theirs" or "foreign"

Case Studies of Balance

 Global Examples

Company	What They Actually Sell
Nike	Not shoes—motivation and athletic identity
Apple	Not phones—innovation and belonging
Facebook	Not social media—connection and identity
Uber	Not rides—convenience and freedom

 Nunc Sells

- 01 Empowerment
- 02 Community
- 03 A better life

 The Vehicle

“Health tracking and budgeting are just the vehicles.”

We leverage technical tools to drive authentic human transformation.

Team Edge and Value

Current Status

Developed entirely on a zero-budget model by university students using skill, dedication, and vision.

What This Proves

- ✓ Resourcefulness
- ✓ Passion
- ✓ Scalability
- ✓ Sustainability

Value to Government

Fresh perspectives unencumbered by bureaucratic thinking

Agility to adapt quickly to user feedback

Deep connection to target demographic (18-35 youth)

Technical skills to maintain and expand the platform

Entrepreneurial mindset seeking efficiency and innovation

Critical Factor

Why You Cannot Discard the Team

Partnerships that sideline original creators often fail because they lose the “soul” that made it resonate in the first place.

The app is a tool. The team is the engine.

Core Functionality Part 1

Health & Wellness

- **Hydration Tracker:** daily water intake monitoring
- **Calorie Counter:** meal-based nutritional tracking
- **Public Health Benefit:** addresses Eswatini's NCDs (diabetes, hypertension) through preventative lifestyle tools

Financial Literacy

- **Budget Tracker:** income/expense management
- **Economic Benefit:** builds culture of savings and financial discipline among youth

Spiritual & Mental Wellness

- **Daily Verses:** inspirational content
- **Social Benefit:** supports mental health, reduces isolation

Core Functionality Part 2

Information & Entertainment

- **Radio Integration:** local and international stations (including Urban Plug—Swazi youth radio)
- **Emergency Alerts:** real-time critical notifications
- **Communication Benefit:** *instant mass communication channel*

Community Building

- **Channels:** follow local creators and organizations
- **Direct Messaging:** secure peer-to-peer communication
- **Social Cohesion:** *strengthens community connections*

AI-Powered ChatBot

- **24/7 information access:** instant answers to user queries
- **Business directory:** local SME discovery and support
- **Government integration potential:** citizen questions about services
- **Efficiency benefit:** *reduces burden on government call centers*

Collaboration Not Competition

Government in Your Hands (GIYH) provides:

- Document applications
- Business registration
- Payment processing
- Service access

Nunc provides:

- Daily wellness tools
- Information discovery
- Youth entertainment
- Community connection

GIYH = official services platform; Nunc = daily lifestyle & engagement layer

The Synergy Model

GIYH Strengths:

- Official government authority
- Secure transactional capabilities
- Comprehensive service portfolio

Nunc Strengths:

- High youth adoption potential
- Daily engagement (not just when services needed)
- Community trust ("for us, by us")

How They Work Together:

01

Gateway effect

ChatBot recommends GIYH services with direct links

02

Youth onboarding

Friendly interface; ChatBot explains GIYH in simple language

03

Emergency communication

Nunc Alerts amplify GIYH announcements

04

Trust bridge

Daily value earns trust, then promotes government services

Trust Advantage

Government App

"They want to monitor us" / "Another initiative that won't work"

Youth-Built App

"Made by people like us" / "They understand our problems"

Case Study: M-Pesa

Succeeded due to perception of local innovation solving local problems in Kenya.

Practical Integration Examples:

01 Business Registration

ChatBot directs to GIYH with specific requirements and direct application links.

02 Health Initiatives

Alerts + ChatBot + trackers supporting GIYH health screening appointments.

03 Youth Employment

Jobs via Channels + FAQs via ChatBot leading to official GIYH applications.

Public Benefits Part 1

1. Health Improvement

Problem

rising NCDs (diabetes, hypertension, obesity)

Solution

free daily tools (hydration, calories, habits)

Impact

preventative health reduces long-term healthcare costs

2. Financial Empowerment

Problem

limited financial literacy, high debt levels among youth

Solution

simple budget tracker teaches money management through practice

Impact

builds savings culture, reduces financial distress

3. Instant Information Access

Problem

difficulty finding accurate info on services, businesses, emergencies

Solution

AI ChatBot provides 24/7 answers; works offline; no data costs for cached content

Impact

reduces time wasted, empowers informed decisions

Public Benefits Part 2

4. Community Connection

Problem

social isolation, fragmented communities

Solution

channels + messaging

Impact

strengthens social cohesion, reduces loneliness

5. Local Business Discovery

Problem

SMEs lack affordable marketing; consumers lack local visibility

Solution

business directory connects buyers and sellers

Impact

stimulates local economy, supports SMEs

6. Entertainment & Mental Health

Problem

limited accessible entertainment; stress from economic challenges

Solution

Urban Plug radio + daily inspirational verses

Impact

joy, relaxation, mental wellness support

7. Digital Literacy

Problem

unfamiliarity with smartphone capabilities

Solution

intuitive design makes technology accessible

Impact

bridges digital divide, prepares users for digital economy

Government Advantages Part 1

1 Direct Youth Communication Channel

Challenge

reaching 18–35 demographic via traditional media

Solution

daily engagement platform for organic reach

Mechanism

push notifications; ministry channels; ChatBot FAQs

Impact

higher message penetration; real-time feedback/metrics; cost savings vs ads

2 Real-Time Public Announcements

Challenge

time lag with newspapers/radio schedules

Solution

Emergency Alerts for instant mass communication

Advantages

geographic targeting; read receipts; multimedia; offline queuing

Use Cases

- ▶ weather warnings
- ▶ public health alerts
- ▶ traffic/road closures
- ▶ national announcements
- ▶ security updates

Government Advantages Part 2

3

Citizen Feedback & Sentiment Analysis

Challenge

disconnected from grassroots opinions

Solution

ChatBot queries + channel interactions for insights

Examples

common policy questions; sentiment monitoring; service gap identification

Impact

evidence-based policy adjustments; proactive problem-solving; builds trust

4

Cost-Effective Service Awareness

Challenge

expensive marketing (TV/radio/print)

Solution

Nunc as distribution channel

Medium	Cost (Annual)	Reach	Targeting
Radio Ads	E250,000+	Broad	Poor
TV Commercials	E500,000+	Broad	Poor
Print Media	E150,000+	Declining	None
Nunc Integration	E0 (partnership)	Youth-focused	Precise (age, location, interests)

Government Advantages Part 3

5

24/7 Government Enquiry Assistance

Challenge

overwhelmed call centers; limited hours; language barriers

Solution

ChatBot answers instantly in Swazi/English

FAQ Examples

Passport apps; Business registration; Home Affairs locations; Tax deadlines

Benefit

reduces call center volume by 40% (based on global case studies)

6

SME & Economic Development

Solution

business directory promotes registered SMEs

Alignment

supports Ministry of Commerce goals; tracks engagement metrics

Example

Ministry sponsors 10 youth-owned businesses in directory

7

Health Campaign Amplification

Diabetes Prevention Example

- 1 Alerts & ChatBot info delivery
- 2 Trackers support lifestyle change
- 3 Adoption rates tracked via data-sharing
- 4 Success stories via channels

Why Youth Matter

Demographic Reality

The core of Eswatini's future potential.

60% of Eswatini's population
under 25 years

! Current Disconnect

Low youth participation in civic processes

Distrust of government institutions

Limited avenues for voice and feedback

Nunc's Bridge Role

01
Meet youth where they
are (smartphones)

02
Speak their language
(relatable)

03
Provide value first before
engagement

04
Create feedback loops
(input matters)

Engagement Tactics

1. Urban Plug Radio Partnership

- Platform for youth voices, music, culture
- Government segments (e.g., "Ask the Minister" Q&A)
- Makes government accessible and humanized

2. Influencer Collaboration

- Current partnership: 8,000 TikTok followers
- Influencers promote Nunc and government initiatives
- Authenticity through peer endorsement

3. Gamification (Future Feature)

- Badges for civic engagement (GIYH transactions, town halls)
- Leaderboards for health goals
- Rewards from government partners (data bundles, event tickets)

4. Youth Advisory Board

- Selected users advise on features and government messaging

Direct feedback loop for continuous improvement

Ministry Partnership

Partnership Structure

- Official endorsement (validate Nunc as complementary youth platform)
- Content collaboration (official info for ChatBot FAQs)
- Data sharing agreement (anonymized insights shared quarterly)
- Co-marketing (Ministry promotes Nunc; Nunc promotes GIYH)

Ministry Benefits

- **Youth engagement tool at no development cost**
- **Demonstrated innovation and responsiveness**
- **Positive public perception (supporting youth entrepreneurship)**

MTN Partnership

Why MTN Needs Nunc

- Youth are primary mobile data consumers
- Nunc drives data usage (radio streaming, image loading)
- CSR alignment (health, education)

Proposed Partnership

- Zero-rated data (Nunc uses no data allowance)
- Bundled promotion campaigns
- Co-branding ("Powered by MTN")

MTN Benefits

- Increased subscriber acquisition/retention among youth
- Differentiation from competitors
- Positive brand association (supporting local innovation)

Nunc Benefits

- **Massive user acquisition (70%+ market share)**
- **Reduced data cost barrier**
- **Credibility through major corporate partnership**

Municipalities Partnership

Why Municipalities Need Nunc

- Need better resident communication (billing, disruptions)
- Limited youth engagement in local governance
- Need platforms for service delivery feedback

Proposed Partnership

- Official municipal channels for announcements
- Localized alerts (water shutoffs, refuse schedules)
- Service feedback (potholes, streetlight outages via chat)

Municipality Benefits

- **Direct communication**
- **Faster issue resolution (real-time reporting)**
- **Improved service delivery perception**

Nunc Benefits

- **Hyperlocal content increases daily relevance**
- **Government validation at multiple levels**
- **Potential revenue (municipalities pay for premium features)**

Phase 1 Implementation

Phase 1 (Months 1–3) — Partnership Formalization

01 Ministry of ICT

- Sign MoU outlining collaboration terms
- Establish joint working committee (2 gov reps, 2 Nunc reps, 2 IAE reps)
- Define data-sharing protocols and privacy frameworks

02 Technical Integration

- Ministry provides official FAQs for ChatBot
- GIYH API integration (if feasible) for referrals
- Emergency Alert system testing with Ministry comms team

03 Deliverables

- **Signed partnership agreement**
- **ChatBot loaded with government FAQs**
- **Pilot emergency alert (e.g., public holiday announcement)**

Phase 2 Implementation

Phase 2 (Months 4–6) — MTN Partnership & Marketing

01 MTN Eswatini

- Negotiate zero-rating agreement
- Co-branded launch campaign (“Powered by MTN”)
- Bundle promotions

02 Marketing Push

- Influencer campaigns
- University campus activations
- Radio interviews (Urban Plug + national stations)
- Ministry endorsement featured in materials

03 Deliverables

- **MTN zero-rating active**

10,000+

Downloads Target

- **Media coverage (print, radio, TV)**

Phase 3-4 Implementation

Phase 3–4 (Months 7–12) — Rollout, Optimization & Expansion

03 Phase 3 (Months 7–9)

- Municipality onboarding: Mbabane & Manzini pilots; staff training; localized alerts
- Business directory launch: onboard first 20 businesses; launch catalogue; track metrics

Deliverables: 2 municipalities active; 20+ listings live; user feedback iteration

04 Phase 4 (Months 10–12)

- Feature refinement: UI improvements; bug fixes; enhance ChatBot; introduce speech recognition
- Government integration deepening: pilot advanced features (e.g., polls); quarterly analytics reports; expand to additional ministries
- Revenue optimization: affiliate partnerships with financial institutions; corporate sponsorships

★ Final Deliverables

50,000+

Active Users

- **Government using platform for at least 2 campaigns**
- **Positive ROI demonstrated**

Why This Partnership Is Critical

For Eswatini:

- Government investment in youth innovation
- Positions Eswatini as tech-forward in SADC
- Builds digital infrastructure for smart governance

For the Ministry:

- Youth engagement goals without massive budget
- Measurable impact (user stats, campaign reach)
- Innovative public-private collaboration model

For the Public:

- Healthier, smarter lives
- Easier access to government services
- Proof Swazi youth can compete globally

What We're Not Asking For:

- ✗ Government to build this for us (already built)
- ✗ Unrestricted funding
- ✗ Exclusivity

What We Are Asking For:

- Endorsement
- Collaboration
- Trust
- Long-term partnership

Immediate Next Steps

• Week 1–2

draft & sign MoU; establish joint committee; begin FAQ content collection

• Week 3–4

MTN outreach (with Ministry referral); municipal briefings (Mbabane, Manzini); public announcement preparation

• Month 2

official launch event; app live on Google Play with zero-rating; first emergency alert test

• Month 3

first analytics report; business directory onboarding begins; user feedback loops established

“The best way to predict the future is to create it.”

— Peter Drucker

? Will Eswatini lead, or follow?

? Will the government partner with its youth, or sideline them?

? Will we build trust through collaboration, or perpetuate disconnection?

Revenue Streams

Auto Accounting + Business Directory Listings

- 54 premium spots (18 categories × 3 businesses)
- Annual fee: E2,000 - E5,000 per listing (E167 - E500 monthly fee)

Year 1 Target: **E100,000 - E350,000**

Urban Plug Radio Advertising

- 30-second ad slots during peak hours
- Sponsored segments (e.g., "Budget Tips")

Year 1 Target: **E10,000 - E25,000**

Premium Features (Year 2+)

Subscription	Analytics	Marketing
E50/mo	E100/mo	E75/mo

Year 2 Target: **E25,000 - E50,000/mo**

Affiliate Commissions

- Promote financial services (insurance, savings)
- E-commerce integrations (local stores)

Year 3 Target: **E12,000+ annually**

Year 1 Financial Projections

01 Launch Phase Expenses

Dev & Maintenance	E30,000
Marketing	E25,000
Legal & Registration	E15,000
Team Stipends	E54,000
Office/Utilities	E30,000
Miscellaneous	E20,000
Total Expenses	E174,000

Radio Ads	E50,000
Premium (100 subs)	E120,000
Affiliate	E12,000
Total Revenue	E1,932,000

Year 3 Net Position

+E1,262,000

Healthy Profit Margin

3 Year Summary

01 Cumulative

Year 1	-E24,000
Year 2	E900,000
Year 3	E2,1620,000

Breakeven Point: Month 18

ROI for Government Partnership: Immeasurable (youth engagement, service awareness, public trust)

02 CURRENT STATUS: ZERO-BUDGET DEVELOPMENT

Achievement to Date:

- ☐ Fully functional Android app built with **E0 investment**
- ☐ Demonstrates:
 - ⚡ **Team capability** (world-class skills without formal employment)
 - ⚡ **Resourcefulness** (maximizing free tools and platforms)
 - ⚡ **Commitment** (hundreds of unpaid hours)
 - ⚡ **Scalability potential** (imagine impact with proper funding)

What This Means for Government:

- ☐ **Low Risk:** Platform already proven viable
- ☐ **High Potential:** Current limitations are funding, not capability
- ☐ **Authentic Passion:** Not driven by profit alone—genuine desire to solve problems

THANK YOU
